DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Forsyth et al. (US 6,687,917)

Forsyth et al (hereinafter Forsyth) discloses a chamois (10) sewn onto a crotch of the bicycle shorts, col. 2, lines 66-67, including a top breathable polyester layer (35), a cushion foam layer (36) and a bottom layer (41) which is conventionally stitched to the top layer which defines an enclosed envelope containing the cushion layer, col. 7, lines 41-62 and as shown in figures 13 and 15. Further, the chamois can be configured for a male or female cyclist's anatomy having cutout portions (37, 38 and 72) which minimizes bunching as illustrated in figures 15 and 16. The top and bottom layers are made of knitted blend of nylon elasticized fabric, col. 6, lines 48-57. However, Forsyth does not show the chamois having a printed graphics thereon.

Art Unit: 3765

It would have been obvious to one skilled in the art provide the chamois of Forsyth with a printed graphics/insignia as required for a particular application thereof or as a matter of design choice.

Furthermore, Forsyht states that the top and bottom layers can constructed of various blends of material, col. 2, lines 61-65 and col. 4, lines 1-4. Therefore, it would have been obvious to one skilled in the art to form the top and bottom layers of the chamois of Forsyth from any desired material that was available at the time the device was made.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
